Amendment to Application - Confirmation of Parking Arrangements

Application reference: 98.20673.FUL
The Meeting House, 42 Brook Street, Hexthorpe, Doncaster, ZZ46 0BG

Proposal

Change of use of the first floor from Use Class C3 (residential) to Use Class F2 (local community uses).

Car parking

Confirmation has been requested of the parking arrangements at the property, including how many spaces are available and how many could be allocated to the first floor. There are 20 unmarked car-parking spaces at the property, private and for the exclusive use of the property. These are situated in the rear yard, which has a rolled-asphalt (tarmacadam) surface. They are accessed via private gates onto the adjoining street.

Previously, each of the former three flats was provisionally allocated a single car-parking space in this yard, but few tenants ever required one. The remaining spaces were allocated to the community centre but have very rarely been used by that part of the property.

Parking provision

It is understood that the Local Plan states one space per 22-25 square metres for conference centres above a threshold of 2,500 square metres. The total meeting space for the whole property is around 150 square metres, which would require six or seven car spaces if the threshold were disregarded. The first floor, which is the subject of this application, has around 50 square metres of meeting space, which would require two car spaces.

Given that the number of spaces required (six) is substantially lower than the 20 spaces already provided, the applicant considers that the proposal complies with parking policy for the whole property, even before consideration of the threshold. There is also a small public parking area opposite. Many visitors and users will continue to come from the local community and can easily walk to the property.

Allocation of spaces

The applicant would prefer no specific allocation of spaces to the first floor because the property would initially be let as a whole. If planning policy requires a specific allocation, the applicant requests a condition requiring two spaces for the first floor.
