Northern Gas Networks - Consultation Response

Application reference: 99.53186.FUL
46 Station Road, Skellow, Doncaster, ZZ38 8VR

Consultation response

Northern Gas Networks acknowledges receipt of the planning application at 46 Station Road, Skellow, Doncaster, ZZ38 8VR, application reference 99.53186.FUL.

We have no objections to these proposals.

Construction precautions

There may be apparatus in the area that may be at risk during construction works. Should planning permission be granted, the promoter of these works must contact Northern Gas Networks directly to discuss our requirements in detail. Any required diversionary works will be fully chargeable.

Scope and limitations of mains records

Northern Gas Networks mains records show only those mains we own in our role as a Licensed Gas Transporter. Privately owned networks and gas mains owned by other Gas Transporters may also be present. Where Northern Gas Networks knows of these, they are represented on the records by a shaded area or a series of crosses. Information about such pipes should be obtained from their owners.

Records information is supplied without obligation or warranty, and its accuracy cannot be guaranteed. Service pipes, valves, siphons, stub connections and similar apparatus are not shown, but their presence should be anticipated.

Northern Gas Networks, its agents and servants accept no liability for errors or omissions. Mains-record information must not be relied on beyond 28 days from its date of issue.

Contact route

For further information or to discuss work near gas apparatus, contact the Northern Gas Networks Before You Dig Team.
