Design And Access Statement Including Heritage Statement

DESIGN, ACCESS & HERITAGE STATEMENT NEW DETACHED DORMER BUNGALOW TO THE REAR OF 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS

Introduction. The proposed development consists of the construction of a new detached dormer bungalow to the rear of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS. The proposals herein have been developed and reviewed in conjunction with national guidelines, including National Planning Policy Framework <redacted_date> (NPPF), Doncaster Local Plan <redacted_date> (DLP), South Yorkshire Residential Design Guide <redacted_date> (limited guidance only), Carr Lodge Design Code (limited guidance only), Revised Transitional Developer Guidance <redacted_date> (RTDG), and Bessacarr Conservation Area Appraisal – revised (BCAA). National & Local Considerations. It is recognised that there is a national demand for new homes. NPPF (5) 61 states that “To support the Government’s objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed”. It continues “The overall aim should be to meet an area’s identified housing need, including with an appropriate mix of housing types for the local community.”. Section (4) 73 NPPF states that “Small and medium sized sites can make an important contribution to meeting housing requirements for an area”, and, “are essential for small and medium enterprise housebuilders to deliver new homes.”. DLP Chapter 3: Our Vision for the Future, sets out the aim “to ensure housing provision meets the housing need and aspirations” of the local population “by increasing the provision of new homes for all to meet current and future needs, and create mixed and balanced communities.”. Section 2.23 states, “In line with the national picture, Doncaster has challenges in meeting the housing needs of the borough. The Borough needs to ensure that it delivers a range of house types, tenures and sizes moving forward, in order to meet the existing and projected needs of its population.”. Within this national and local context it is recognised that areas of particular status, such as the Bessacarr Conservation Area, should balance national and local pressures, with the need to preserve the protected characteristics of those areas. It is believed that the proposals being brought forward, through both consultation and sensitive design, have carefully considered and balanced those needs, and can positively contribute to both national and local housing plans. Site & Heritage Context. The site of the proposed new dormer bungalow is part of the large rear garden of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS. The host property is a corner plot of an existing residential area, with the large rear garden running parallel to, and fronting onto, a significant portion of Middlefield Road. 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS falls within the Bessacarr Conservation area, being part of the ‘Market Lane Corridor’. It sits on the south west side of Market Lane, which “contains houses of lesser architectural quality than their opposite neighbours” BCAA (6)i. Whilst the postal address is “74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS”, the entrance to the host property has been located at the top of Middlefield Road since it was first built.

Some of the older properties nearby were built in <redacted_date>’s, however 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS was originally built in the mid <redacted_date>’s, and further modernised in the mid <redacted_date>’s. It is constructed of orange brick at ground floor level, with mixed course-faced sandstone to the first floor, along with grey concrete pitched tile roof. BCAA (7) notes that “there are no listed buildings in the Conservation Area”, but there are ‘key unlisted buildings’ which have architectural merit, history or function. 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS would not be considered of special interest or a ‘key unlisted building’. Whilst 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS sits in the Bessacarr Conservation Area, the conservation area does not extend beyond the rear garden (and proposed site), any further down Middlefield Road. The next property after the end of the garden (and proposed site) is 6 Middlefield Road, a modest sized detached dwelling, probably built in the second half of the 20th century. It is of note, that numbers 2 and 4 Middlefield Road were never built in the space to which the development is now being proposed ie. the rear garden of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS. Opposite 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS, on Middlefield Road, the first three buildings also sit within the Conservation Area. The first is a building made up of multiple flats, built on rough ground in the early <redacted_date>’s, before 1 Middlefield Road, a traditional detached house of dark red brick and plain clay roof tile (typical of the Conservation Area (BCAA (9)), and roads surrounding it such as Ellers Avenue), and lastly 3 Middlefield Road, a dormer bungalow of mixed styling, with dark red brick, roman concrete roof tiles,

and front dormer windows to the roof. Background & Planning History. The site is designated as within the Residential Policy Area as shown within Doncaster Local Plan (<redacted_date>-<redacted_date>) Adopted – Policies Map. Full planning permission has previously been 'granted' for this site, and this application for 'outline' permission seeks to re-establish the principle for development on the site, before a more detailed application with reserved matters is submitted. This application is identical in external shape, scale and site layout to previously 'granted' planning applications <redacted_reference> and <redacted_reference>. The internal layout has been updated to reflect modern and 'accessible' living with open plan kitchen/dining/sitting room, separate lounge and up to four bedrooms. <redacted_reference>|Erection of one detached dwelling on approx 0.20 ha of land|Land To Rear Of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS South Yorkshire ZZ63 7KS Planning Permission GRANTED <redacted_reference>|Erection of one detached dwelling on approx 0.20 ha of land (being extension of time previously granted permission under ref <redacted_reference> on <redacted_date>.)|74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS South Yorkshire ZZ63 7KS Planning Permission GRANTED The original planning applications fell within the recently established Bessacarr Conservation Area, and full consultation was made with both Doncaster Council Planning Department and the Conservation Officer <redacted_name> incorporated in the scheme to provide a new building sitting in a good sized plot, whilst leaving the existing host building remaining in a large plot. DLP Policy 44: Residential Design – "New housing, extensions, alterations and changes of use to housing will be supported where they respond positively to the context and character of existing areas, or the host property, and create high quality residential environments through good design.". RTDG 2.1 also stresses the importance of Character and Amenity. The planning report of the 'granted' applications noted: Page 3 of 6

"It is considered that the proposed development is appropriate to its setting and would safeguard the existing character of the site, and it's surroundings. The design is considered to be acceptable and in keeping with the existing character and appearance of Bessacarr Conservation Area.". External Design. The area of Bessacarr in which the proposed development is situated is a mix of detached and semi■detached houses. Many of the properties on the older roads such as Ellers Avenue, Drive, Crescent, and Road, are typically constructed of red brick and plain clay roof tiles. The design of the proposed dormer bungalow would be viewed positively when reviewed in the context of RTDG 2.1, and RTDG 2.4.1-2.4.5 External Design, reflecting the traditional feel of many of the properties on those surrounding roads. The predominant central gable, similar to 1 Middlefield Road, combines with dormer windows in the pitched roof, similar to 3 Middlefield Road, to create an asymmetrical front elevation, typical of the area. The varied and traditional roof shapes of the proposal further combine to create an interesting, pleasant and traditional look. The proposed building is set back from the tree-lined road, and respects the building line of 6 Middlefield Road. The new building only marginally extends beyond the rear of 6 Middlefield Road, but with a generous 8 metres separation from it's direct neighbour, is in no danger of encroaching within the 45 degree lines extended from the rear ground floor windows of next door. The design has also considered it's site, being slightly further uphill than 6 Middlefield Road, reducing it's height and massing as a dormer bungalow design, rather than a traditional two storey house plus roof. This consideration ensured that the proposal was in no way overbearing to it's direct neighbour, and is no greater in height. At 26 metres from the rear of the existing host dwelling (74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS), the existing pitched roof side elevation of 6 Middlefield Road is mimicked by the new addition, which along with reduced massing as a dormer bungalow, creates little negative impact on the view from the host. Any impact on 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS is further reduced as the host dwelling sits considerably higher and further up hill than the proposed site. The proposed development will provide a footprint area of 136m2 in a site area of 575m2. With a generous plot width of 22 metres, the design gives the impression of sitting in a larger plot from the street, in keeping with the surrounding properties, and Bessacarr Conservation Area in general. The proposal enhances the visual appeal of the area by providing a thoughtfully designed house that contributes positively to the streetscape. DLP 44: Residential Design A) states "Developments must protect existing amenity and not significantly impact on the living conditions or privacy of neighbours or the host property (including their private gardens), be over-bearing, or result in an unacceptable loss of garden space.", and B) states that proposals will be supported where 2. "layout, density, siting, spacing, massing, form, detailing and materials are sympathetic to the character of the area, or the existing host property". The planning report for the previously granted applications noted: "It is not considered that the proposed development would result in an unacceptable loss of amenity to any nearby properties due to overlooking, highway safety, character of the site, or existing vegetation subject compliance with the relevant conditions." In keeping with the predominant early 20th century properties of the Conservations Area, the proposed development has been designed to be built of high quality sustainable materials, including high quality facing bricks and natural clay roof tiles. Page 4 of 6

Exact building materials will be proposed as part of the full planning submission of reserved matters to follow. All aspects of RTDG 3.6 Detailed design requirements for infill developments, and RTDG 3.7 Design checklist,

have been considered and responded to positively in the proposals. Inclusive Access & Parking. Whilst the proposal could be considered as backland, tandem, or infill development, it is of relevance that the host site occupies a corner plot, giving the proposed site direct and natural access to Middlefield Road. RTDG 3.1.1 states that “Residential backland and infill developments have a role to play in delivering housing targets for the city.”. As previously noted, numbers 2 and 4 Middlefield Road were never built on the proposed site, with the first existing property (adjoining the proposed development) being 6 Middlefield Road. The proposed development seeks to create a driveway opening in the existing low stone wall of the site, giving direct access for pedestrians and vehicles onto Middlefield Road. The driveway would incorporate suitable falls for drainage, but offer ‘level’ accessible/inclusive access into the front door of the property, as well as a ‘safe zone’ between the dwelling and public road. In accordance with RTDG 2.3.7, 8 & 9, the driveway design offers adequate parking for two vehicles, plus an additional space in the incorporated garage (being larger than 3mx6m), in excess of the required local policy standard, DLP Policy 44 B) 6 and DLP Appendix 6. The garage has been designed at over 3.6m wide, to potentially accommodate pedal cycles or a mobility scooter, in addition to parking a vehicle. Generous landscaping widths to both sides of the property offer further opportunity for bicycle storage. The design would likely accommodate an electric vehicle charger to the outside of the garage to charge vehicles on the driveway, The proposed site is also well placed to take advantage of local public transport networks, with frequent bus services accessed on nearby Market Lane,
giving easy access to Doncaster Lakeside, and city centre transport hubs and railway station for
onward travel. The proposed site is well placed for walking to local amenities, as set out in DLP Policy 44: Residential Design B) 1. “good access to local services, community facilities, open space and public transport via walkable neighbourhoods.”. These include Bessacarr and Willow Primary Schools, green spaces at Haslam Park and Bolton Fields, and local shops and medical/dentistry services at Alston/Brierley Rd junction and Nostel Place. The previously ‘granted’ planning permission noted “The design [] would not result in a significant detrimental effect on the amenity, traffic or parking.”. Landscaping. A new access will be created onto Middlefield Road. The low existing front boundary wall will be retained and modified to produce the driveway opening, utilising the existing stone to create brick pillars. In addition, it is intended that many of the existing shrubs behind the wall be retained as partial screening, though not at a height so as to be detrimental to road safety. The existing hedgerow between the proposed development and 6 Middlefield Road will be retained, and a new fence with shrubs or hedgerow between the north east boundary and host property will be implemented to promote biodiversity and ecological routes. Page 5 of 6

The majority of the existing mature trees will be retained to the perimeter of the development. A tree survey was carried out as part of the original ‘granted’ submission, and will be updated as part of the full planning submission of reserved matters, as some of the orchard trees have since died and been removed. The surrounding gardens will be landscaped in keeping with the existing planting. As such the development will retain the appearance of a mature plot, in keeping with the appearance and character of the Conservation Area in general. To the rear of the proposed development are areas of lawn and patio. Generous separation to each side of the proposed dwelling provides further opportunity for lawn & shrubs, offering expected ‘day■long’ sunshine within the private gardens, varied outdoor amenity space (RDTG 2.4.5), and importantly waste storage in accordance with RTDG 2.4.4. It is intended that a landscaping plan will be included as part of the full submission to follow. Layout, Use & Future Occupancy. The proposals are for a new private residential dwelling with up to four bedrooms, that complies with DLP Policy 45: Housing Design Standards. The interior layout has been brought up to date, compared to the previously granted application, now with an open plan kitchen/dining/living room, along with separate lounge. In accordance with DLP Policy 45: Housing Design Standards, A), gross internal floor area and bedroom sizes have been included on the plan drawings (RTDG 2.4.9), and exceed the Nationally Described Space Standard. While the proposals and drawings show up to four bedrooms, it is recognised that one of the bedrooms might easily be used as a home office to reflect modern need for ‘working from home’ practices. As was originally intended, the house has been designed with ‘lifetime homes’ principles in mind (now reflected in Approved Document M, Building Regulations England), so that adaptions can easily be made to suit a range of occupants with regard to age, disability, ethnicity or social grouping. Some examples of where the design exemplifies such thinking are: 1) The front driveway creates a level threshold entry into the property. 2) The downstairs lounge can easily be converted into a bedroom (as was the layout previously) with the kitchen pantry providing an en-suite WC for such a bedroom. 3) A straight staircase was specified to easily incorporate a stair-lift if required. 4) Wide hallway to easily allow for disability support equipment. 5) Double doors into the main kitchen/dining/living area to aid accessible access. 6) Open plan kitchen/dining/living area with ease or circulation space. 7) Large downstairs WC. 8) Wide internal garage for storage of bicycles to mobility scooters. The design also provides for plentiful storage in adherence to DLP Policy 44 B) 5, such as under the stairs, kitchen pantry, separate utility room, and large garage - aspects sometimes overlooked in mass produced new homes. The proposal creates a home that meets modern living requirements, including energy efficiency, comfort, and accessibility, and aligns with Doncaster Local Plan

Chapter 6: Meeting the Need for New Homes: Policy 7: Delivering the Necessary Range of Housing (Strategic Policy): “In order to provide the necessary housing supply required for the changing needs of residents and to support independent living, new developments should include the provision of homes which are adaptable, accessible, and suitable for people with a wide range of needs in line with Policy 45. It must Page 6 of 6

also be demonstrated how the provision of housing types suitable for older people can be increased, especially bungalows.”. Conclusion. The proposed development will be a valuable addition to the Bessacarr Conservation Area, adding a thoughtfully designed home, suitable for a range of inclusive living situations. The proposals align with both national and local plans for new housing, (DLP 6.3 “The NPPF aims to significantly boost the supply of homes.”, specifically:

Doncaster Local Plan Chapter 6: Meeting the Need for New Homes: Policy 7: Delivering the Necessary Range of Housing (Strategic Policy): “The provision of opportunities to accommodate custom build and self-build homes will be encouraged on housing allocations and elsewhere.” Policy 10: Residential Policy Areas - Within Residential Policy Areas, as defined on the Policies Map: A) New residential development will be supported provided: 1. the development would provide for an acceptable level of residential amenity for both new and existing residents; and 2. the development would help protect and enhance the qualities of the existing area and contribute to a safe, healthy and prosperous neighbourhood; and 3. the development would meet other development plan policies including those relating to flood risk, open space, design and sustainable construction.

While it is recognised that planning policies have been updated in recent years, and particularly in reference to DLP Policy 44 C), the report of the Doncaster Council Planning department to ‘grant’ the prior applications concluded: “Having taken into account all the planning considerations raised in the consultations and representations, against the policy background [] it has been concluded that the proposed development is acceptable. In particular, the Local Planning Authority is of the view that its accordance with the relevant policies of the Doncaster (Unitary Development) Plan, taken together with advice in the relevant national planning policy guidance, justify the development in this location. It is considered that the proposal is of a design and appearance that would not unduly affect the visual amenity of the site, its surroundings or the Bessacarr Conservation Area, and would not result in a significant detrimental effect on the neighbouring amenity, traffic or parking subject to mitigation by the attached planning conditions.” Both of the neighbours opposite the proposed development (1 & 3 Middlefield Road), the neighbours closest to, and adjoining, the proposed development (6 Middlefield Road), and the neighbours next to the host property have been consulted with, including full drawings and plans. All responses were supportive of the application and proposals. It is proposed that the application for ‘Outline Planning Permission’ be ‘granted’ in advance of a full application and submission detailing reserved matters.
