Comments Details Commenter Type: Objector Stance: Customer objects to the Planning Application Reasons for comment: Comments: REF: 94.62735.OUT 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS Date: <redacted_date> Objection to Planning outlined in REF: 94.62735.OUT 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS To whom it may concern, My name is XXXXX; I am the owner of XXXXX which is XXXXX. Our home is basicallyXXXXXXXXXXXX. The planning application submitted will have very serious implications to our quality of life. For the following reasons. The planning application submitted by the owners of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS place it within a council designated conservation area. The building will not enhance the area. To my recollection all the houses that have been built in people's back gardens can barely be seen from the road. This is an exception to that as it will be facing directly onto Middlefield Road. The building plans submitted show a very large dwelling. Larger in square footage than our own home. The building in all but name is a large house not a dorma. It is 2 floors high with a roof. I notice on the plans that they have not submitted the height of the building but based on the height of the 2 floors I estimate it to be 7 Metres in height. A very important point to note is that at the bottom of the garden of 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS there is a large drop down XXXXXXX of approximately 1.2 Metres then the garden slopes upwards from there up to 74 Market Lane, Bessacarr, Doncaster, ZZ63 7KS. I approximate that where the dwelling is planned the base of the building will already be 1.5 Metres higher than the base of our home. This will effectively make the building very imposing with a height of 8.5+ Metres and only feet awayXXXXXXX. Our home as a point of reference is approximately 7.5 Metres high. The dwelling would also block out any sunlight XXXXX With the cooperation of the previous owner a Beech hedge was put at the bottom of the garden along with concrete slabs as the aforementioned drop was causing land slips as it is a 1.2m vertical drop and we were experiencing land slips most winters or after heavy rain. Were this land to be altered in any way we would fear the return of land slippage. The aspect of the dwelling XXXXX has three windows. The window in bedroom 2 will be around 5-6m above the base level XXXXXXXX. This would be a serious invasion of privacy. The trees to be removed mentioned in the planning application are home to a vast array of wildlife as is the beech hedge, they are all very mature. The removal of these trees will absolutely have an impact on the conservation area. We have lived XXXXXXXX for 43 years and have made many improvements over that time and spent an awful lot of money. The council recently approved a planning application for a large home at a neighbouring property which sits
XXXXXX on the other side of the hedge. We feel if this recent application is to be approved we are going to be boxed in. This is something that the conservation area was aiming to prevent. Please take into consideration the fact that we have lived here for 43 Years and are now both in our 80's. We both feel that if this proposal was to go ahead it would have a huge bearing on our mental health in our remaining years. We respectfully request that you take into account our fears and to not approve this application. Yours Sincerely <redacted_name>
